

Quench 50/52

Under-Sink Filtration System

The Quench Model 50/52 is a perfect solution for situations where a ready supply of filtered water is needed, but space is too limited for a full-size filtered water cooler.

Quench Advance Carbon Filtration Provides Clean, Great-Tasting Water

- Remove sediment, dirt and particles as small as 1 micron in size.
- Use activated carbon to remove chlorine, fine particles, off-tastes and odors.
- Include special phosphate and lead filters to remove hard water impurities and heavy metals.
- Feature an antimicrobial filter that uses silver ion technology to neutralize microorganisms.

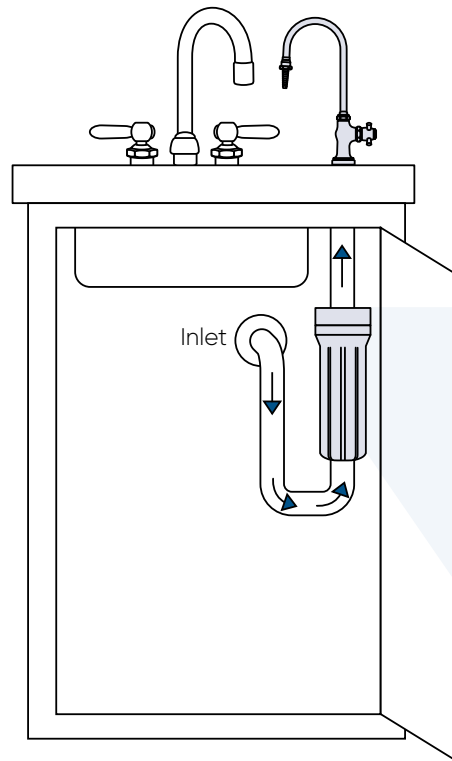

water up

Quench 50/52

The Quench Model 50/52 reduces contaminants commonly found in tap water:

- Asbestos fibers
- Chlorine taste
- Odor
- Dirt
- Lime scale sediment
- Turbidity
- Cryptosporidium
- Giardia cysts
